

CONTROL MODE

PAN FOLLOWING MODE

The roll axis and tilt axis are locked. The camera pans as you turn the gimbal left and right.

FOLLOWING MODE

The roll axis is locked so the camera pans and tilts following the handle movements.

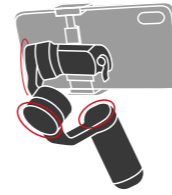

LOCKING MODE

All three axes are locked so the camera is fixed in one direction.

VORTEX MODE

Vortex Mode gives you the freedom to make 360° barrel shots in all dimensions.

FULL-RANGE POV MODE

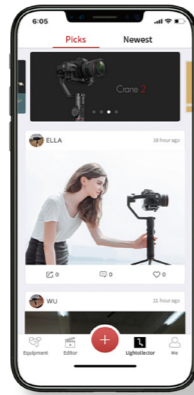

Full-Range POV Mode allows 360° synchronous movement on all three axes, offering an immersive experience like never before.

ZHIYUN APP

Available on the App Store

ANDROID APP ON Google play

ZY Play

ZY Play is a powerful assistant app dedicated for Zhiyun stabilizer users. With it, you can realize remote control and gimbal settings to stabilizers easily.

Lightcollector

Open the app, you will find the world's biggest video sharing community for stabilizer lovers - Lightcollector, with detailed stabilizer tutorials and amazing footage created and shared by professionals worldwide.

SMOOTH-Q2 Specs

Operation Voltage	3.6 V
Output Voltage	5 V

/ Simplicity Meets Functionality
/ Direct Control to Phone Cameras

SMOOTH Q2

3-Axis Smartphone Stabilizer

SMOOTH-Q2 is the smallest mobile gimbal in ZHIYUN family. Unlike any other foldable gimbal in the market, SMOOTH-Q2 is only 204mm long, ready to be into your handbag or pocket. Built from aluminum alloy, SMOOTH-Q2 has yielded higher strength and reliability. The handle is covered with soft silicone for increased comfort. Featuring 6 modes, SMOOTH-Q2 makes a promise in functionality. It supports direct control to native iOS and Android phone cameras for photo and video taking. SMOOTH-Q2, a magical filming tool in your palm, perfect fit for any lifestyle.

MOVIE MAGIC IN YOUR POCKET

FEATURES

Ultimate Small, Ultra Strong

Unlike any other gimbal in the market, you don't need to fold up SMOOTH-Q2 to make it small. Measuring only 204mm long, SMOOTH-Q2 is almost equivalent to a sunglass case that you can throw into your handbag. The aluminum-built miniaturized body is crafted for maximum solidity. Coated with soft silicone, the handle is comfortable in your hand.

Clip up and Go

The clip-up design realizes easy transition between standby mode and startup mode by folding and expanding the horizontal arm of the gimbal.

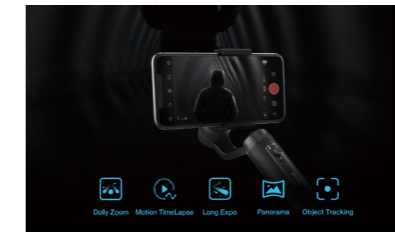

Capture Moments in Fast Lane

SMOOTH-Q2 supports direct control to native iOS and Android phone cameras for photo and video taking, providing a fast lane for you to capture the moments.

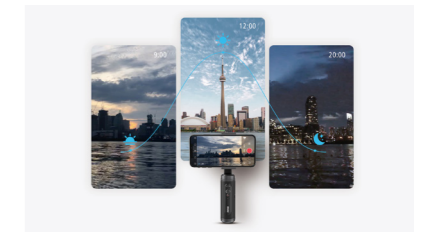

New Portrait Gesture

Tired of traditional portrait gesture? The new generation algorithm allows you to enter a new portrait mode in an effort-saving manner. Live stream now!

Tiny Gimbal Packs a Punch

Unleash your artistic side with SMOOTH-Q2. Explore the easy-to-use filmmaking functions in SMOOTH-Q2, such as timelapse, Vertigo shot, object tracking, and panorama, etc.

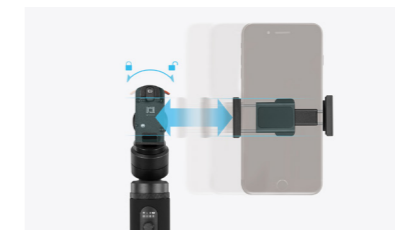

All Day Battery life

Powered by a strong battery system, SMOOTH-Q2's battery life is up to 17 hours with a rechargeable battery. In addition, SMOOTH-Q2 has micro-USB port that allows it to work as power bank.

Simplicity Meets Functionality

Switch among versatile modes with one button. Besides Pan Following Mode, Following Mode and Lock Mode, SMOOTH-Q2 integrates Vortex Mode which gives videomakers the freedom to create 360-degree barrel shots in all dimension. Newly added Full-Range POV Mode allows 360-degree synchronous movement on three axes, providing an immersive effect to the video.

Quick Release Latch for Instant On and Off

We take care of every detail to make it compact and more importantly, easy to use. The innovative quick release latch design and handy phone clamp allow you to take on and off the smartphone in a split second. Maximum Payload: 260g.

Have More Fun with ZY Play & Lightcollector
